# T-ATP

## ABOUT US

Founded in 2022, The Accelerated Training Program (T-ATP) is a nonprofit that provides accessible cybersecurity education to underrepresented groups to provide digital literacy and equity. At T-ATP, we research and bring awareness to systemic exclusion in cybersecurity education while cultivating young leaders in the cybersecurity space.

## T-ATP SERVICES

T-ATP serves youth in underrepresented communities in the K-12 space, and students preparing to enter or advance in the cybersecurity workforce. We are committed to exposing these communities to all facets of cybersecurity education.

## VISION

Our non-profit was born from a commitment to study how to remove the systemic exclusion of cybersecurity education from marginalized groups. Our responsibility is to make cybersecurity education curriculums rigorous but available to all. We wholeheartedly pledge to change how cybersecurity education is taught through legislation and hands-on support to those in the community.

## MISSION

With 8% African-Americans and 24% women in the cybersecurity workforce, there's a disparity in access to cybersecurity education. T-ATP will work with legislators to provide equitable, accessible, and rigorous cybersecurity education by creating a national cybersecurity curriculum. A national cybersecurity curriculum will ensure that cybersecurity education is equitable for all, thus creating equal opportunities as everyone will be afforded the same chances.

## GOALS

- In our first year, we would like to identify and train twenty program participants within the T-ATP curriculum.
- Establish working relationships with policymakers to provide equitable cybersecurity education to all.
